## STRATEGY

The aim of the AMC (Actively Managed Certificate) on CT1 Real Estate Opportunities is to generate solid and long-term returns for investors through real estate projects and core real estate investments. In addition, the investor participates in potential rising values of great real-estate during their term and upon exit.

The certificate only invests in indirect real estate investments. All investments have an International Securities Identification Number (ISIN) and are restrictedly tradable. First-class buildings, outstanding locations and "prime" projects in Switzerland are the focus of the assets. The combination of long-term interest and stable income as well as investment opportunities in development projects with short- and mid-term returns is extremely attractive to the investor.

The management of the certificate relies on renowned partners, such as ACRON AG, which has global expertise and an impressive "track record", for the selection of investments. Income such as dividend distributions or interest payments are either added to the AMC's cash position or distributed to the holders of the Certificate as an additional payment at the discretion of the Strategy Manager. The target return for investors is around 4.5% p. a.

In the following the individual investments are briefly introduced:
